

## Technical Aptitude Assessments

MeasureUp's Technical Aptitude Assessments are ideal for career guidance, pre-employment selection and job placement.

- Psychometrically validated
- Proven measure of learning ability meeting legal and professional standards
- Four 5-minute sections: numerical, verbal, symbolic reasoning, visual speed and accuracy
- Delivered online in a proctored (supervised) environment

### REPORTING MADE EASY

You can customize your information any way you want with our instant reporting system.

- Detailed score report visually shows raw score and what percentile they fall into on each area of testing
- Total percentile puts candidates into an aptitude rating category compared to the validated test

### USE FOR CAREER CHOICES & TRAINING

Our web-based system is a quick and reliable way to identify individuals with high technical aptitude who can be trained at less cost and apply their skills faster. These assessments must be proctored to verify examinee identity.

- Measure general reasoning and perceptual abilities that are important for success in professional technical jobs
- High overall scores indicate a greater likelihood the examinee will be successful in learning and performing IT work.
- Gain guidance on the type of IT work examinee would most likely perform successfully

### USE FOR HIRING

Will they succeed on the job or project? With MeasureUp's Technical Aptitude Assessments, you can predict job performance, trainability and cognitive skills.

- Identify applicants who are likely to repeat mistakes, will not adapt well to new systems and procedures, do not set priorities and lack versatility
- Identify applicants who will solve problems quickly, communicate complex information effectively, solve problems with alternative approaches, multi-task, understand and follow instructions
- Easily compare candidates to each other
